Claim Rejections - 35 USC § 103

1. Claims 38,39,42,43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wagshul et al (6501978).

Wagshul is deemed to render obvious the methodology of the above claims.

Wagshul teaches coordination of operation of an appliance, which is subject to interference by a magnetic resonance device, with an MRI device such that the appliance is altered in operation to avoid interference by the MRI signals. See col. 2, line 60 to col. 3, line 46, for example. One of ordinary skill in the art would realize that the teachings of Wagshul would be advantageous to a pacemaker patient having an implantable device, and thus to use such teachings with such a patient would have been obvious.

Since a new rejection has been made, this action is not being made final.

Allowable Subject Matter

2. Claims 1-37 are allowed.
